

GENERAL

If TXA not given already, give 1 g

Is there still significant bleeding?

If yes, treat each variable before moving on to the next

Doses are for 70 kg patient – adjust if significantly over/under-weight = Dose x Weight / 70

* If refractory bleeding, aim for thresholds *in brackets*

** Alternatively, consider 10-20 iu/kg Prothrombinex

Re-test ROTEM 10 mins after each intervention complete
